

PREPARED FOR FUJIFILM

The operating system for the print network.

Four AI-powered platforms, built in under seven months, that quote, produce, sell and market print – for franchise networks, independents and the vendors who equip them.

Advantage MIS

Advantage AI

Raring2go!

DPS Sales Intelligence

Every press is only as productive as the software around it.

Print businesses run on quotes, artwork, imposition, scheduling, proofs and invoices, and most stitch that together by hand. We built the connected layer, and the AI on top of it, so every press sits inside a faster, more profitable business.

Advantage MIS

IN FIELD PILOT NOW

FUJIFILM FLOW API • JAN 2027

Being piloted in the field today: the management platform for print centres and independent print shops: instant multi-mode quoting, 14-stage job control, prepress, web-to-print, EPOS, CRM and finance. Ships with a verified Fujifilm Revoria & ApeosPro press catalogue.

689 data models • 1,114 API endpoints • 355 screens

Advantage AI & the Franchise Platform

BUILT

A multi-tenant franchise operating system with a streaming AI assistant, franchise coach, lead scoring, workflow builder and metered AI billing. Proven pattern for running hundreds of locations from one brain.

788 data models • 3,824 routes • 1,202 templates • 93 scheduled automations

Raring2go! Business-in-a-Box

IN BUILD • DUE Q2 2027

The franchise and publishing OS for a network of 80+ territories: one login per franchisee, one territory edition driving print-ready PDF and digital magazine, advertiser sales, native email, royalties and AI agents in one system. Foundations, edition pipeline, newsletters and job engine are already built.

Today: 148 tables • 72 pages • in internal UAT

DPS Sales Intelligence Cloud

BUILT

An AI CRM and field-sales engine for print-technology suppliers: UK-wide prospecting, equipment-lifecycle "buy windows", lease and ROI quoting, call recording and coaching, and a customer deal room.

162 tables • 608 API routes • 121 test files

~~5 days~~ → **15 min**

In the field today: live in **39 centres** across our platform versions since June 2026. Pilot centres cut enquiry-to-quote from a 5-day average to 15 minutes, and users rate Advantage **9 / 10**.

WHY IT MATTERS TO FUJIFILM – AND TO EVERY PRESS BRAND

One integration surface, many customers. Connect a Fujifilm device once to the platform and every centre on it – franchise or independent – can quote, schedule and sell against that device with real speeds, real click costs and real capacity.

Advantage in the field: the scorecard.

Advantage has been in the field since June 2026 and is live in 39 centres across our platform versions. Volumes are still building, so we report only what is already solid.

ENQUIRY TO QUOTE

Why these numbers can be trusted

- Every quote is **snapshotted** and can be re-costed
- Job stage changes are **timestamped** by the state machine
- AI confidence is stored per quote, and low confidence routes to review
- An append-only **audit log** sits behind it all

What we will report next

- Quotes generated and AI-quote acceptance
- Jobs moving through all 14 stages
- Rework rate and top causes
- Customer feedback and testimonials

Published as volumes build; the platform already records each one.

What the pilot is proving for Fujifilm

1 · Speed is real

Enquiry-to-quote falls from days to minutes in live centres.

2 · Staff will use it

Users rate the platform 9 / 10 across 39 centres.

3 · The data will be rich

Utilisation and job mix are captured to feed Flow from January 2027.

Every quote is a forecast of clicks and consumables.

Advantage costs each job to the click on a named press. So before a job runs, the platform already knows the clicks, stock and finishing it will use. Aggregated and opt-in, that is a demand signal Fujifilm has never had at centre level.

A real usage signal

Utilisation by press model, job mix by stock and size, click volumes and rework rates – by centre, by region, by month. Today that picture comes from sell-in; this adds sell-through.

Consumables pull-through

The right consumables at the right time, with fewer stock-outs mid-job. Counters and usage can trigger reorder and service conversations automatically.

Smarter upgrades

Capacity data shows which centres are outgrowing a press. Paired with the DPS refresh-window engine, that becomes a timed, targeted upgrade conversation.

THE DEMAND SIGNAL, IN ONE LINE

Installed presses × utilisation × clicks per hour = a live consumables forecast

Fujifilm supplies the installed base; the platform supplies utilisation and job mix from the centres on it.

What centres get in return

- Quotes costed on their own click rates
- No stock-outs halfway through a job
- Capacity and rework insight they can act on

Privacy by design

- Centre-owned data; the feed is opt-in
- Aggregated by default, never customer artwork or prices
- Consent history and audit already in the platform

Steps 1–4 are built today in Advantage MIS. The opt-in usage feed is proposed and depends on API access to Fujifilm's Flow software (due January 2027).

Four paths for Fujifilm.

You choose the pace.

There is more than one way to benefit from this platform. Each path below shows what Fujifilm gets, what it commits, and what it means for us.

A

DEEPEST PARTNERSHIP

Invest now and grow it together

A strategic investment that funds the Fujifilm Flow integration, print engine and rollout.

- Fujifilm gets:** equity upside, first-integration status, roadmap influence, channel rights, opt-in sell-through data
- We get:** capital and the strongest press-vendor partner

Commitment: highest · **Terms:** to be discussed

B

Licence the software

Fujifilm licenses Advantage (and optionally Raring2go!) to offer its customers under its own brand, while we run the platform.

- Fujifilm gets:** a branded workflow offer without building it, and a faster route to market
- We get:** licence revenue and distribution; we keep the IP

Commitment: medium · **Fee model:** to be discussed

C

Roll out through your channel

A reseller or referral partnership: Advantage is offered alongside press sales, with a share of the subscription.

- Fujifilm gets:** a stickier installed base and usage insight, with no equity or build cost
- We get:** access to Fujifilm customers at scale

Commitment: low to medium · **Revenue share:** to be discussed

D

Do nothing

We carry on. Fujifilm Flow API access is still planned for January 2027, and the platform keeps growing across the market.

- Fujifilm:** remains one machine profile among many, with no preferred terms or early usage data
- Risk:** another press maker builds the deeper integration first

Commitment: none

At a glance

	A · INVEST	B · LICENCE	C · CHANNEL	D · NOTHING
Commitment	High	Medium	Low-medium	None
Speed to market	Fast	Fastest	Fast	–
Influence on roadmap	Highest	Medium	Some	None
Financial upside	Equity	Licence margin	Revenue share	None

The paths can be combined: A with C, for example, invests in the platform and sells it through the Fujifilm channel.

Back the print side only – or the whole suite.

Investment can be aimed at one part of the platform or spread across all of it. Choose a scope first, then a level from the previous page. Nothing here is fixed: we want to hear what suits Fujifilm.

1

Print core

The software that runs a print business and sells print equipment.

- **Advantage MIS:** quoting, jobs, prepress, web-to-print
- **DPS Sales Intelligence:** equipment-sales CRM
- **Advantage Coworker** and print AI
- **Fujifilm Flow** integration

Revenue: guide £399 a month per centre, plus AI usage

Best for: a focused bet on print and the Fujifilm relationship

2

Print + publishing

Scope 1, plus the engine that turns territory editions into press work.

- **Everything in Scope 1**
- **Raring2go! Business-in-a-Box:** print-ready and digital editions for 80+ territories
- **Print engine:** PDF/X, colour, imposition

Revenue: Scope 1, plus guide £49 a month per Raring2go! account

Of interest to Fujifilm: editions become recurring short-run press volume

3

Whole suite

All four platforms, including the proven franchise engine.

- **Everything in Scope 2**
- **Franchise platform and Advantage AI:** live in three countries
- Payments, web and SEO, marketing automation

Revenue: Scope 2, plus guide £49 a month and a 2.9% transaction fee

Best for: an investor wanting the broadest upside

Choose a scope, then a level

Level 1 • Foundation

Connect and certify. Flow integration, security and certification, and a first 100 paying centres.

Level 2 • Accelerate

Grow. Coworker rollout, onboarding and support, and a path towards 500 centres.

Level 3 • Scale

Expand. US and Australia, a joint channel programme, and a path towards 1,000 centres.

Funding amounts are to be discussed. Print core and the options on the previous page work together: licence or channel deals (B, C) can sit alongside any investment scope.

Why scope matters. Print core is the fastest path to Fujifilm-connected revenue. Adding publishing creates recurring press volume from Raring2go! editions. The whole suite adds a platform already taking real payments in three countries. Guide prices reflect current thinking and are not fixed.

Help us shape the right fit.

We have set out the options openly because we want to hear what works for Fujifilm before we propose anything specific. These are the questions we would like to explore together.

Where is your interest today?

PATH	HIGH	SOME	LOW	NOT NOW
A · Invest and grow it together	☐	☐	☐	☐
B · Licence the software	☐	☐	☐	☐
C · Roll out through your channel	☐	☐	☐	☐
D · Not at this stage	☐	☐	☐	☐

Scope

Which part of the platform matters most?

- ☐ Print core: Advantage MIS, DPS, Coworker, Flow
- ☐ Print + publishing: adds Raring2go! and the print engine
- ☐ Whole suite

Size of commitment

What feels realistic on your side?

- ☐ A joint pilot first
- ☐ A smaller first step
- ☐ A larger strategic commitment
- ☐ Not yet decided

Timing

Flow API access is planned for January 2027.

- ☐ Before Flow access
- ☐ Alongside it
- ☐ After a pilot has run

What you would need to see

To move to the next step.

- ☐ More pilot results
- ☐ Security certification
- ☐ Customer references
- ☐ A technical session on Flow

Suggested next steps

1 • Conversation

Agree which path and scope to explore.

2 • Working session

Technical and commercial teams meet on Flow and the pilot.

3 • Proposal

We send a tailored proposal once your direction is clear.

Where Fujifilm accelerates it.

The platforms exist. The next phase is putting them on real presses, in real centres, with real data – and Fujifilm is the partner who can make that happen at scale.

NOW

Advantage in the field

Live pilot of Advantage MIS, Fujifilm press catalogue seeded, Raring2go! in internal UAT, security audit remediated.

JANUARY 2027

Fujifilm Flow API access

The network integration: API access to Fujifilm's Flow software connects Advantage jobs and workflows to the press floor, with JDF/JMF connectors already in the codebase.

Q1 2027

Advantage Coworker

Six upgrades roll out: one coworker across platforms, governed autonomy, proactive briefings, print playbooks, enquiry-to-invoice in one chat.

Q2 2027

Raring2go! Business-in-a-Box launches

After its first real-territory proof point: Edition Factory, native email, finance and royalties, AI agents.

WITH FUJIFILM

Print engine for Raring2go!

Rendered PDF/X output, colour management and imposition so territory editions flow straight to a Revoria press.

WITH FUJIFILM

Dealer & direct sales engine

DPS-style prospecting and refresh-window alerts configured for Fujifilm equipment, with AI call coaching and customer deal rooms.

The partnership in one line

Fujifilm brings the presses and the reach. We bring the software that makes every press-owner more productive – and a reason for them to stay on Fujifilm.
